

WEBSITE BROCHURE

*What you get with a Tecbot
website*

**EVERY WEBSITE WE
BUILD**

**COMES WITH THE
FOLLOWING**

RIGHT OUT THE BOX.

FEATURES

POWERED BY WORDPRESS

All our websites are built from the ground up to your specifications using the most popular website framework on the net. Wordpress has been tried and tested over the years, and now powers over 30% of the web. With endless support, constant updates, and unparalleled flexibility, Wordpress is an easy choice for development

RESPONSIVE DESIGN

In 2018, projections state that 79% of websites will be accessed from a mobile phone. We believe in creating websites that transition seamlessly from desktop, to tablet, to mobile phone in order to capitalise on this. All Tecbot websites are designed responsively, meaning they are developed to work on almost any device.

MODERN LOOK AND FEEL

The web has changed, and development has, too. All our websites are designed with modern components and layouts that capture the attention of the new generation of web users. With a passion for design, we create visually appealing and interactive websites that are built to last in the modern world.

FEATURES

OPTIMIZED

All Tecbot websites are optimised for speed and performance before publication. We ensure that your site runs as it should across all modern browsers and operating systems. No one likes to wait, so we ensure that performance is prioritised for all our websites.

BESPOKE

Your business is unique, and your site should be too. We don't believe in copy and paste. We ensure that we understand how your business works, and what you require from a website before we start development.

COMPLETE SOLUTION

Your website should always work, straight out of the box. We offer a range of packages that allow us to host and maintain your website at affordable rates so you never have to worry about a thing, from the moment your site goes live.

WHATEVER YOUR NEEDS

Whether it's one of the big three or something slightly more unique, we can handle it.

**BUSINESS
PROFILE**
